IRB Fee Schedule for Industry Sponsored Clinical Research

The Ascension Wisconsin Research Institute (AWRI) charges a processing/administrative fee for the IRB review of all industry sponsored human subject protocols. Charging industry sponsors for their share of the costs associated with the IRB review process allows Ascension Wisconsin to continue to provide the level of service required by our researchers.

The fee schedule below is effective 10/15/2017.

Initial IRB Review	\$2500
Continuing Review	\$1000
Changes to Research	\$600
Exempt Determination	\$400
Study Closure	\$200
Administrative Review when using an external IRB (one-time)	\$1200
Non-Research Humanitarian Use Device (one-time)	\$750

These fees apply only to industry sponsored protocols involving human subjects submitted for review by the Ascension Wisconsin IRB. IRB fees do not apply to federally funded studies or studies supported by state, foundation, division or department funds.

There is no charge for modifications not initiated by the Sponsor (e.g., the only change is to study personnel) or submission of reportable events (i.e., unanticipated problems, adverse event (AE) or serious AE, protocol deviation).

For additional information, see the IRB SOP: IRB fees
